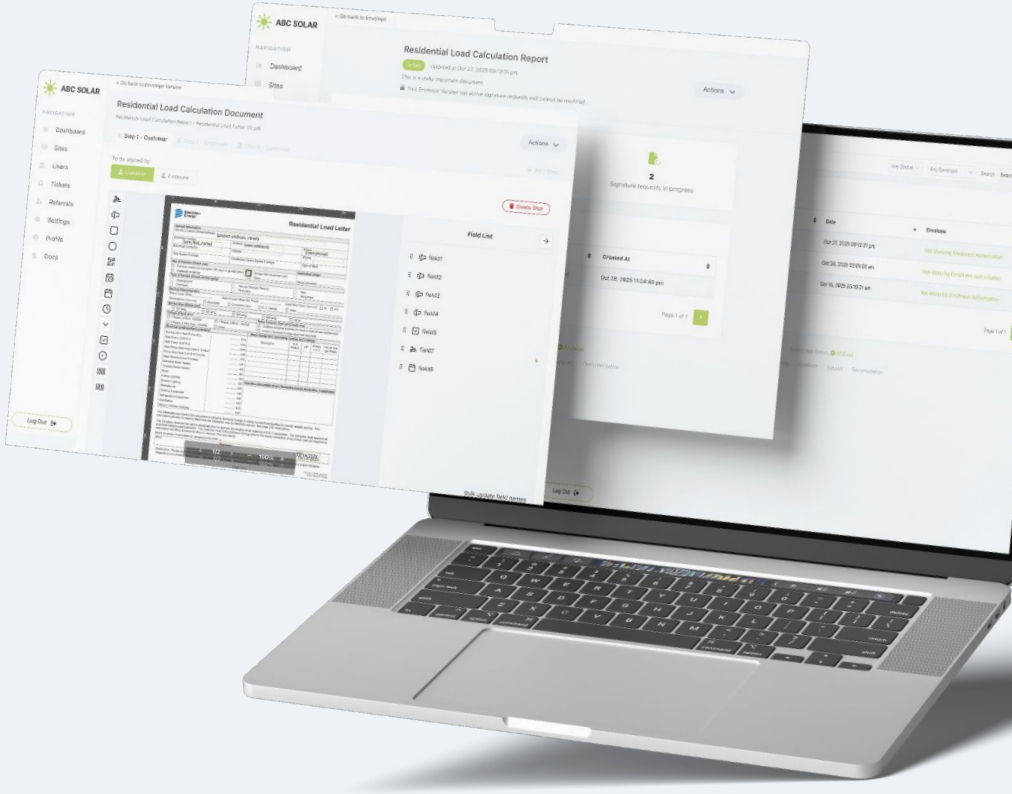
SUNVOY

#1 eSignature Platform for Solar Installers

eSignatures.
Fully Branded.
Built Into Your Portal.

Prepare, send, & collect signatures right in your Sunvoy dashboard.

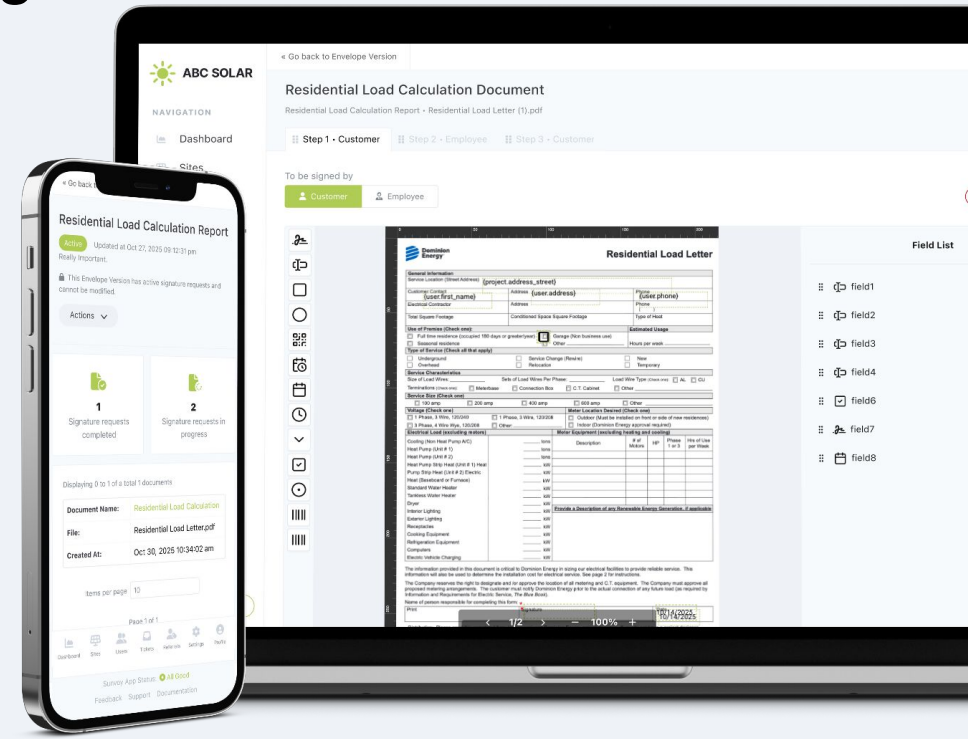
Sunvoy has been rated 5/5 stars by hundreds of solar installers like you!



Simplify Solar Document Signing (All Inside Your Portal)

Eliminate third-party tools, logins, and per-envelope fees & turn document signing into a fully integrated part of your customer journey. You can also use it to **fill out important forms even if no signature is required.**

- Binding & Audit-Logged
- Fully Branded Experience
- Unlimited Envelopes & Signers
- Auto-Filled with Project Data
- Included in Your Sunvoy Subscription



Replace Your eSignature Vendor Completely

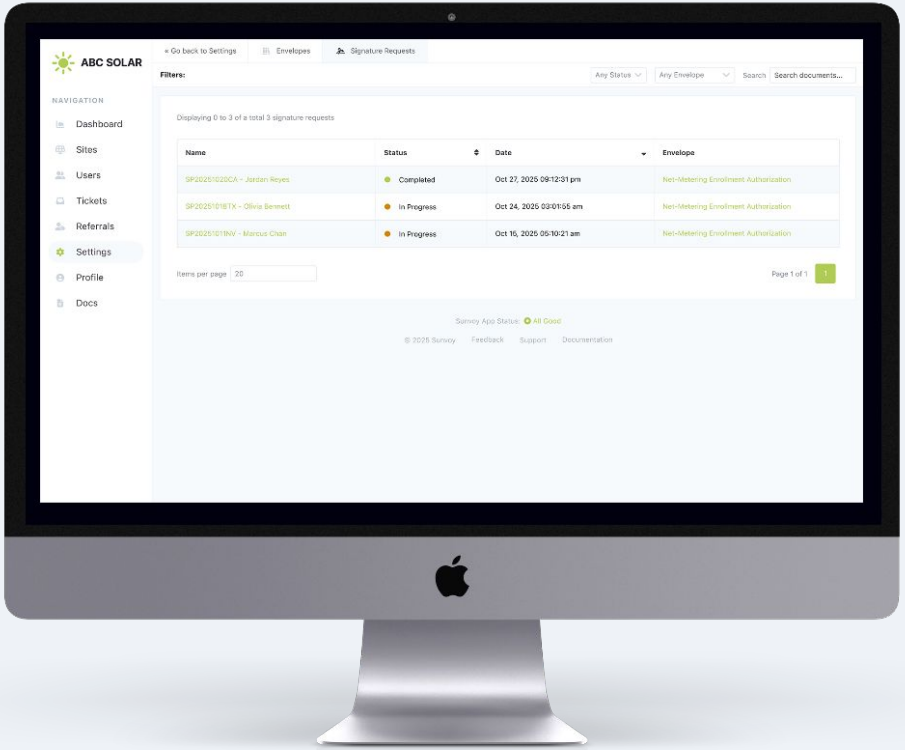
Save thousands each year without sacrificing functionality.

Traditional Tools

- $1–$3 per envelope
- Per-seat pricing
- Extra fees for multi-signer documents
- Hidden overages and PDF limits

With Sunvoy

- Unlimited documents
- Unlimited envelopes
- Unlimited signers
- Included in your subscription (no extra $$$ needed)



Confidence Built In.

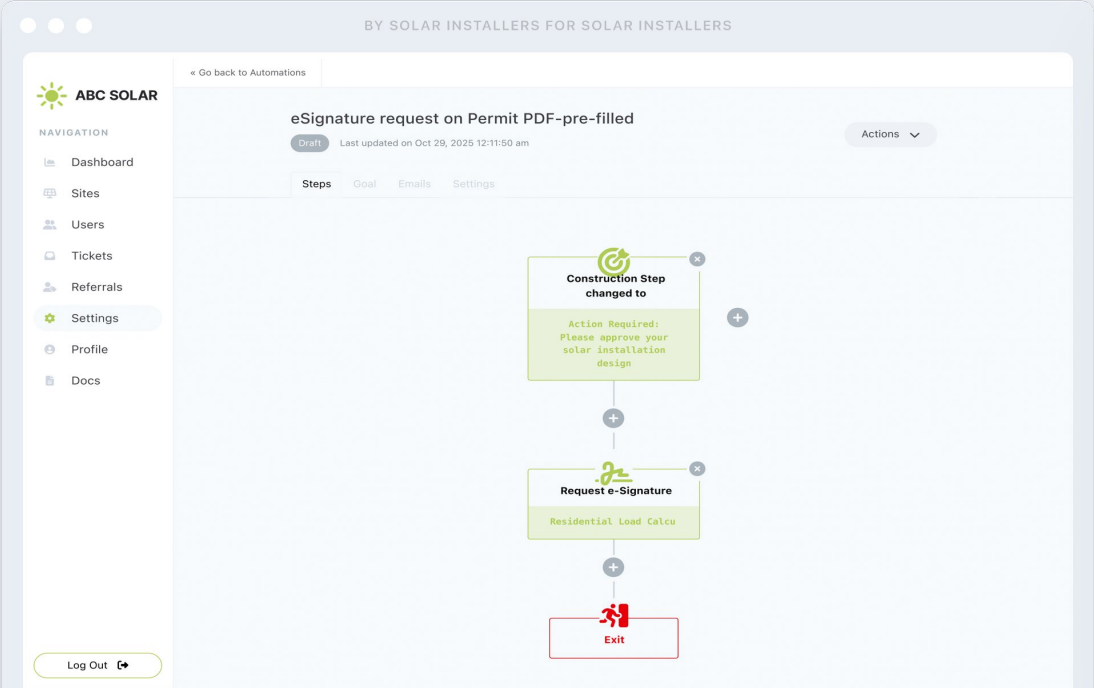
Track every signature with clarity, precision, and peace of mind.

- Know exactly what was sent, when, and to whom
- Get real-time visibility into document status across teams
- Stay compliant with time-stamped audit logs & version control
- Eliminate the “did they sign it?” guesswork for good

From Manual Admin to Smart, Trigger-Based Delivery

Manually sending documents wastes time, introduces errors, and relies too heavily on follow-up emails.

With Sunvoy eSignatures, you can fully automate the process based on your existing project flow.



- Trigger documents based on project milestones (e.g. “Inspection Scheduled”)
- Auto-fill data like system size or install date
- Send multi-party envelopes in seconds
- No more chasing paperwork or waiting for someone to click “Send”

What Makes Sunvoy eSignatures Different?

Everything you need to collect signatures faster, stay compliant, and streamline the customer journey.

Prepare & Send Instantly

Upload and send documents directly from Sunvoy.

Binding & Audit-Logged

Every signature is secure, compliant, and time-stamped.

Branded Experience

Customers sign directly in your app—no outside tools.

Zero Envelope Fees

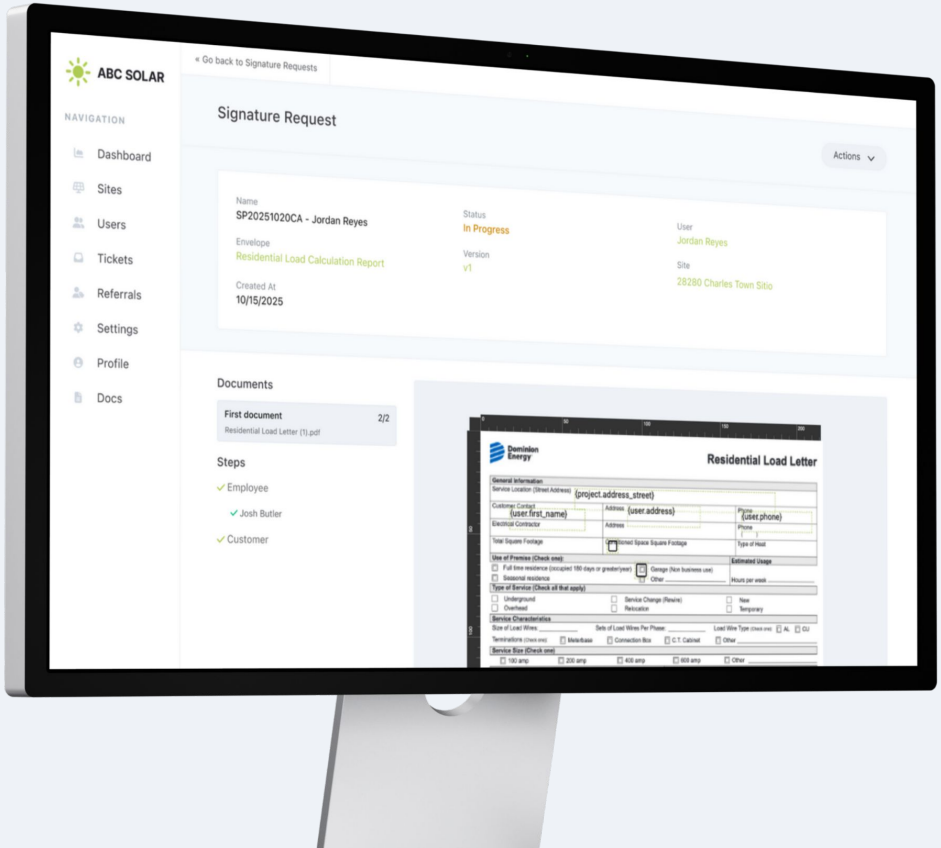
Unlimited docs and signers, included in your plan.

Automated Workflows

Trigger eSign requests based on project stages.

Centralized Storage

Signed docs auto-sync to your Documents tab.



How Sunvoy eSignatures Works

Every step is streamlined to save time, reduce errors, and keep projects moving.

Step 1: Create a Template

Upload a doc, drag fields, define signers

Step 2: Send a Request

Choose a project, hit send. Customers get branded links via email or SMS

Step 3: Monitor in Real-Time

Track status and automate team updates

Step 4: Preserve & Audit

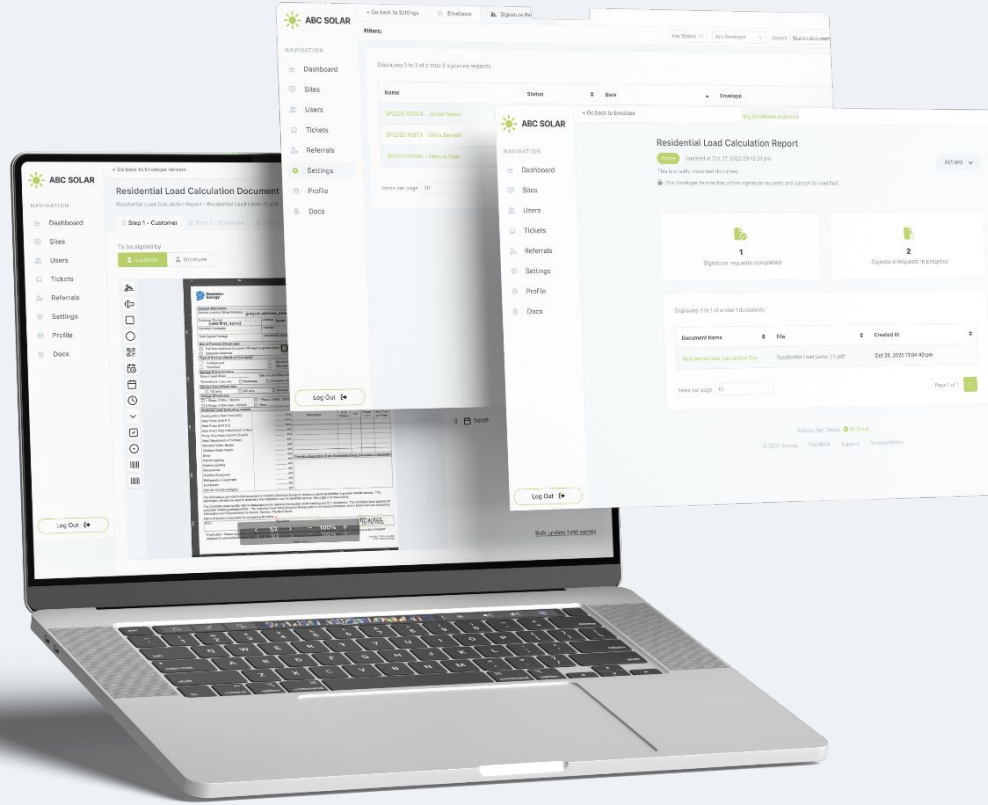
Version control + timestamped logs = full compliance

Built Specifically for Solar, Not Generic SaaS

Designed with your workflow in mind:

- Interconnection forms
- Installation agreements
- Change orders
- SREC registration
- Design approvals

Finally, eSignatures ***made for your industry.***



Results That Matter

Before vs. After Sunvoy eSignatures

Metric	Before Sunvoy	With Sunvoy
Time to send documents	20–40 min	< 2 min
Platforms customers log into	3–5	1
Cost per document	$1–$3	$0
Compliance risk	High	Minimal
